MOHAMMED ASHIF A L

Mobile & Web Application Developer with Expertise in React Native and ReactJS

EXPERIENCE

NanoSoft Engineers India (P) Ltd - Software Developer

June 2023 - PRESENT, Coimbatore

For the past **1** years, I've been an integral part of Nanosoft Solutions's developer team, specializing in CAFM mobile apps. Led collaborative projects delivering user-friendly solutions, optimizing facility management.

Digiminds - Web Application Developer & Digital Marketing Specialist

Mar 2022 - June 2023, Coimbatore

Created engaging content for website, blog, social media, and email marketing campaigns, resulting in a 40% increase in social media followers and a 50% increase in email open rates and creating ecommerce apps using wordpress & ReactJS.

EDUCATION

Bishop Appasamy College - **B.sc.CS**

September 2020 - July 2023, coimbatore - TamilNadu.

PROJECTS

Facility management Application — React Native | React JS

Attendence Application — React Native

React Native:

- Utilized a component-based architecture to build a resilient and adaptable user interface suitable for mobile devices.
- Employed responsive design principles to ensure that the app's UI adapts seamlessly to various screen sizes and orientations, providing a consistent user experience across different cmobile devices.
- Implemented context api for efficient state management, ensuring seamless data flow & consistency across the entire application.
- Implemented performance optimization techniques such as code splitting, memoization, lazy loading to improve app responsiveness, reduce loading times, and enhance overall performance on mobile devices.
- Integrated third-party APIs (e.g., social media APIs,mapping services) to leverage external functionality and enrich the app's features, providing users with a comprehensive and seamless experience.

React JS:

- Leveraged component-based architecture to create a robust and extensible userinterface.
- Designed and developed a collection of reusable UI components, such as buttons,forms, data tables, to accelerate development and maintain consistency throughout the application.
- Implemented context api for efficient state management, ensuring seamless data flow and consistency across the entire application.
- Engineered error boundaries to proactively handle and gracefully recover from unexpected errors enhancing application stability and delivering a smoother user experience and Employed Webpack to bundle and optimize the application.
